Learning Curriculum ~ Our learning curriculum focus this term is on capitalising in the area of resourcefulness. We will be using some of our Wednesday assembly times to discuss how we learn and how we can use our understanding of this to develop and improve as learners.

Student Voice ~ We are reviewing dinner menus and creating new ones. We are also evaluating progress with PE and school sport work, including development of the facilities available on the school field at playtimes. Alongside this we are discussing maths. These items are all part of our school development plan and discussions are fed back to our governing body. Weekly good news and issues assemblies will continue to keep our school running safely, smoothly and happily for everyone.
